

We are hiring!

Data & Business Intelligence Analyst

Job Purpose:

The Data & Business Intelligence Analyst plays a crucial role in transforming complex membership, transactional, and facility data into clear, actionable business strategies. Operating centrally, you will maintain the integrity of our core leisure management databases, oversee recurring payment tracking systems, and build automated reporting dashboards. Your insights will directly influence membership growth, programme development and participation trends. You will also support the quality, integrity and governance of key business data, enabling accurate reporting and continuous improvement across Life Leisure.

Hours

37 hours per week

Location

Life Leisure Support Office
Houldsworth Village

Salary

£33,293 per year

Job Duties:

- Support Life Leisure's continuous improvement programme, using data to identify areas for systematic and controlled improvement
- To recommend and implement new systems to improve data capture and review
- Provide a daily view on the whole customer journey lifecycle
- Provide daily sales and leavers reports to the management team
- Support the automation of reporting processes using appropriate tools and technologies.
- Assist in translating business processes into technical logic to support continuous improvement
- Support the team in maintaining a single customer view by helping to integrate and clean data sources
- To conduct routine audits of data capture and input processes

Benefits

- Free gym membership
- Friends and Family discount
- 50% off swimming lessons
- Tailored wellbeing support
- Cycle to work scheme
- Birthday Leave
- Employee reward scheme
